

SALMAN ANSARI

Technology Enthusiast | Full-Stack Developer

Navi Mumbai, India | +91-9321225058 | bvdudet.salman123@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFILE SUMMARY

Third-year Information Technology student with experience in full-stack development, technical project development, and student leadership. Currently serving as Vice President of the E-Cell, where I lead creative and collaborative initiatives. Passionate about building technical communities, organizing events, mentoring peers, and leveraging technology to create impactful student experiences.

LEADERSHIP

Vice President, E-Cell — Bharati Vidyapeeth, Navi Mumbai 2026 – Present

Design Head, BETA 2025 – 2026

- Led the club's design team, guiding creative direction and design decisions
- Designed event posters, flyers, and other creative assets

Social Media & Design Member, College Council 2025 – 2026

- Took over design responsibility for the council after the original design lead departed
- Designed event posters, social media creative assets, and the Alkemy (college fest) banner

TECHNICAL SKILLS

- Languages: JavaScript, TypeScript (basic), Java, Python, SQL, HTML, CSS
- Frontend: React.js, Bootstrap, Responsive Design
- Backend: Node.js, Express.js, PHP, REST APIs, Firebase
- Databases: MongoDB, MySQL
- Cloud & DevOps: Google Cloud, AWS, Azure, Docker (basic)
- Tools & Practices: Git, GitHub, VS Code, Figma, Linux, Agile, OOP, Data Structures

PROJECTS

ShadowMind AI — AI Data Leakage & Shadow AI Monitor — *In Development (Prototype)*

- Designing a browser-based governance tool to flag sensitive organizational data before it is submitted to generative AI platforms
- Built and tested a Python rule-based detection engine identifying sensitive data patterns (emails, phone numbers, API keys, PII) using regex and keyword matching
- Planned next phase: Chrome extension (Manifest V3) integration, monitoring dashboard, and ML-based classification with Scikit-learn

Customer Support Ticketing System (MERN Stack) — *Completed*

- Built a full-stack ticket management application using MongoDB, Express, React, and Node.js
- Implemented ticket creation and status tracking workflows (Open, In Progress, Resolved)
- Developed REST APIs for backend operations and designed a responsive frontend for efficient ticket handling

Interactive Terminal Portfolio — *Completed*

- Designed and built a personal developer portfolio with a custom terminal-style interface, implementing CLI-style commands (weather lookup, calculator, resume download)
- Integrated the Open-Meteo API with browser geolocation to deliver real-time weather data
- Implemented a neo-brutalist visual design system for a distinctive, recruiter-facing UI

EDUCATION

Bachelor of Technology in Information Technology (Third Year) — Bharati Vidyapeeth (Deemed University), Navi Mumbai
2024 – Present

Higher Secondary Education — ICLES' Motilal Jhunjunwala College, Vashi 2022 – 2024

ACHIEVEMENTS

- 2nd Place, UI/UX Competition — Alegria 2026, National-level fest, Pillai University
